vaccination was administered within the United States, her injury lasted longer than six months, and neither she, nor any other party, has ever received compensation in the form of an award or settlement for her vaccine-related injury. Amended Petition at 1, 6. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On October 12, 2023, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Respondent concluded that "[P]etitioner's alleged injury is consistent with SIRVA as defined by the Vaccine Injury Table." *Id.* at 6. Specifically, Respondent determined that "[P]etitioner had no history of pain, inflammation, or dysfunction of her left shoulder prior to vaccination; pain occurred within 48 hours after receipt of an intramuscular vaccination; pain was limited to the shoulder in which the vaccine was administered; and no other condition or abnormality has been identified to explain [P]etitioner's shoulder pain." *Id.* Respondent further agrees that Petitioner suffered the residual effects of her condition for more than six months. *Id.*

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
